

Ancient India and China

Although Indian and Chinese histories make up an important part of World History, we sometimes lack foundational knowledge when it comes to these civilizations. In an effort to help you stay organized and categorize the information we have learned about India and China thus far (chapters 1-4), I have designed this lesson.

Directions: Research the following terms in the textbook. Look at chapters 1-4. Take quick notes, and note the years in particular. Then, create a timeline for each of the following civilizations. (One timeline for India and one timeline for China) Include all of the below terms on your timeline, along with 2-3 bullet points of relevant identifying information. Include at least 5 images on each timeline.
